Register Interest

Prior to main platform launch a register now mechanism has been deployed which allows users to submit their details prior to main platform launch.

Register Interest

☐ I confirm I am over 18 years old and have read the **terms and conditions**

☐ I'm not a robot   reCAPTCHA
Privacy - Terms

CLICK HERE TO REGISTER

Note: All Fields Are Mandatory, Username will be used in a public leaderboard, we advise not to choose your real name.

In order to verify their registration the user must click a unique link which is automatically sent to the email address they submitted. This helps to avoid any fake sign ups from users.

For future rewards for registrations and referrals (see the goldX documentation) the registered users must complete Know Your Client (KYC) Due Diligence Service (DDS) level 1 so they can see all of the fuse.gold services. This is achieved by activating their accounts (previously registered, reset password) on main platform launch and then completing the KYC process. Typically this will need to be completed within a specified timeframe (likely to be 3 months from main platform launch).

Referrals and Points System

To encourage users (potential clients) to register and refer other users to the fuse.gold platform the reward token GOLDX will be offered for referrals. A fixed amount of GOLDX tokens will be allocated as rewards based upon how many registrations are completed during the "Register Interest" phase prior to main platform launch.

Rewards

The amount of GOLDX tokens for rewards has a baseline figure which then increases at an agreed amount for a number of Registrations above the baseline. This is summarised in the table below.

Criteria	Amount GOLDX Tokens
Baseline Reward - Up to 10,000 Registrations	500,000
Every 1,000 Sign ups over 10,000	100,000

Points System

To distribute the GOLDX reward tokens a points system is used to reflect how many rewards a user is entitled to claim. This is also used to populate the Leaderboard for Registration Referrals and defines the rankings. The points are not limited and gradually increase as more registrations and referrals are created. Points awarded per event are summarised in the table below, note that qualifying referrals must be verified and registered users must be verified to be awarded their points.

Event	Amount of Points	Points Assigned To
User Registration (non-referral)	100	User Registering (Verified)
User Registration via Referral Link	110	User Registering (Verified)
User Registration via Referral Link (Referrer has less than 50 sign ups)	110	Referrer
User Registration via Referral Link (Referrer has more than 50 sign ups)	120	Referrer
Referrer has over 50 Verified Referrals	500	Referrer

Leaderboard

During the Register Interest period a leaderboard is provided to track rankings for referrals with the mockup for the design (includes calculations and definitions) available online [here](#).

Reward Distribution

Once the main fuse.gold online platform is launched there will be a specified time period (typically between 3 and 6 months) for all Registered Interest accounts to complete full sign up and complete the simple and intuitive Know Your Client (KYC) process. Once this time period is over the fully verified referrals (completed KYC) will be snapshot and the points re-calculated on these verified numbers. Until this point all points and rewards are estimated.

Distribution of the GOLDX token rewards will be based upon this snapshot of the points to work out percentages for the distribution and users will then be able to connect their wallet and claim their GOLDX rewards using the "Claimelly" service.
